

The OmniFlex™ Spray-and-Squeegee System

OmniFlex™ can be easily transformed into a Spray-and-Squeegee or Mop system, providing a superior yet cost-effective alternative to traditional mopping in restrooms and more.

Simply add the optional OmniFlex™ “Black Box” Pump System to the Trolley-Bucket and you’re ready to go. Flush surfaces and fixtures clean with the indoor pressure washer and then mop or squeegee the soil and water to the drain, without having to touch contaminated surfaces. The OmniFlex Spray-and-Squeegee process yields better results in less time than traditional mopping.

PERFECT FOR:

Restroom Cleaning:

- Small Restrooms
- Convenient Drains
- Light Soil Loads

Mobile Chemical Dispensing

Elementary Schools

Nursing Homes

Sports/Fitness

HIGHLIGHTS

- Kaivac’s 150 and 500 psi pump systems outperform lower powered Spray-and-Squeegee options on the market today.
- This “indoor pressure washer” rinses away soils and other unwanted bio-pollution that traditional cleaning methods leave behind.
- Spray-and-Squeegee process, using only fresh water, yields better results in less time than traditional mopping.
- Automatic chemical metering and injection reduces costly waste while insulating the worker from unnecessary chemical exposure.
- The ‘Black Box’ pump compartment is easily removed for shipping or exchange.
- Very easy to learn and use. Even a first-time user can achieve great results.
- Just add the optional OmniFlex Wet/Dry Vacuum to convert to a full-functioning Spray-and-Vac system for even better and faster results.
