

Kaivac Spray-and-Vac

When it comes to cleaning restrooms and other heavily soiled areas, nothing beats Spray-and-Vac cleaning technology—and this modular approach offers an easy way to get there. Just combine the Pump System with the Wet Vacuum and the Trolley-Bucket for the ultimate cleaning experience.

Modeled after the original No-Touch Cleaning® machine, the Spray-and-Vac system is built for extreme soil removal. It empowers workers to clean hygienically without touching contaminated surfaces. Plus, it helps cut labor, chemical and equipment costs.

PERFECT FOR:

Education
Food Service
Convenience Stores
Healthcare
Retail

Restroom Cleaning
Kitchen Cleaning
Stairwell Cleaning
Stripping Waxed Floors
Spill Pick-up
Flood Pick-up

HIGHLIGHTS

- Studies show that Spray-and-Vac systems are up to 60 times more efficient in removing bacteria from grout lines than mopping, which is more likely to spread contamination.
- A trained operator takes as little as one minute per fixture to clean a restroom compared to an industry average of three minutes per fixture.
- Kaivac invented the Spray-and-Vac cleaning category and maintains a strong lead in market adoption and product innovation.
- Automatic chemical metering reduces chemical waste while insulating the worker from chemical exposure.
- Leaves floors clean and dry, which means reduced slip and fall accidents and immediate availability.
- Cleaning solution always stays fresh because soiled water is vacuumed into a separate tank.
- Lifetime warranty on the vacuum motor with exclusive use of Kaivac cleaning chemicals.

Why is Spray-and-Vac Better?

Traditional cleaning tools, like mops and wipes, remove very few soils, germs and other indoor pollutants. In fact, studies show they often simply spread them around. Then, workers end up crawling around on their hands and knees wiping soiled surfaces and fixtures by hand.

Modeled after Kaivac's industry-leading No-Touch Cleaning® systems, the Spray-and-Vac system is specifically designed to remove the maximum amount of soil and bio-pollution.

Just apply automatically diluted cleaning solution to fixtures and floors in low pressure, and then wash the soils loose with a power rinse of always-fresh, clean water. The indoor pressure washer flushes soils out of grout lines and tight places that mops can't reach. Finally, just vacuum the floor dry – completely removing soils, moisture and biopollution from all surfaces, grout lines and crevices, leaving the floor dry and soil free.

Certified by the National Floor Safety Institute (NFSI) for providing high traction.

Spray-and-Vac System Includes:

- Black Box Pump System
- Wet Vacuum
- Trolley-Bucket

Vacuum Specifications:

Tank	10 Gallons (37,85 l)
Tank Cleanout	100% via Dump/Drain Hose
CFM	90 cfm (2548 l/min) for AC motor
Motor Lift	92 inches (233,7 cm) for AC motor

Pump System Specifications:

Spray Line	45 ft (13,7 m)
Quick-Connect Gun	Yes
Electrical Cord	25 ft. (7,6 m)

500 psi Pump (34,5 bars)

Low Pressure Flow Rate	1.00 GPM (3,8 l/min)
High Pressure Flow Rate	.75 GPM (2,8 l/min)
