

A Cooler Clean.

KAIVAC® COOLER CASE CLEANER

KAIVAC®

FEATURES + BENEFITS

- + Proper case temperature reduces product spoilage and waste while protecting customers from foodborne illness
- + Clean coils not only help improve energy efficiency by 35% or more, they also extend the life of the cooler
- + Clean coolers eliminate a primary cause of unnecessary and costly service calls
- + Sanitary appearance and conditions increase customer satisfaction and purchases
- + Increased productivity over other methods — 50% or better
- + The integration of pressure washing and vacuum extraction provide unrivaled soil and odor removal
- + The simple system is easy to learn and worker friendly
- + Hygienic cleaning capability reduces the risk of illness or outbreak from biological contamination

KAIVAC® COOLER CASE CLEANER

REFRIGERATION

What if there were a fast, easy and touchless way to clean the internal basins and coils of refrigerated display cases? Too good to be true? Think again. The **Kaivac Cooler Case Cleaner** is designed especially for this unique grocery industry cleaning task.

Just pull the case's base panels, vacuum all the liquid and debris out of the catch basin, blast contaminants and dust out of the coils and the basin with the spray wand, and... DONE. It's truly that simple. Refrigeration cases are left clean and efficient, eliminating odor, protecting expensive product, reducing power bills, and prolonging the life of the case.

Kind of a no-brainer, right?

KAIVAC COOLER CASE CLEANER

Kaivac's Cooler Case Cleaner offers a simple, effective solution for successful maintenance of your commercial refrigeration units. With a specially designed built-in indoor pressure washer and a powerful wet vacuum, you can achieve clean, safe and odor-free coolers operating at peak efficiency in less than half the time of conventional cleaning methods.

VACUUM WAND

Sturdy, one-piece wand made of aircraft aluminum for cleaning multi-surface floors.

17-GALLON RETENTION TANK

Holds 17 gallons of soiled water in upper tank. Easy-access port combined with quick-flush dump hose simplifies emptying and cleaning of tank.

LARGE-CAPACITY CLEAN-WATER TANK

Holds nearly 20 gallons of hot water. Tank can be filled with multi-faucet fill hose or easy-access fill port.

INSTANT DRAIN

Attaches to vacuum hose and suctions to floor to extract low-lying moisture creating a vacuum-powered floor drain.

KAITUTOR™

Video training system leads the operator through the cleaning process.

15-FT. SPRAY HOSE & ERGONOMIC WAND

Spray pressure is delicate enough to use on condenser fins but powerful enough to clean heavily-soiled areas.

Protected by multiple US patents. Multiple patents pending.

FLEXIBLE POWER OPTIONS

GFCI POWER CORD (25 FT.)

Allows the user to cover extensive areas by unwrapping length of power cord as needed.

LITHIUM-ION BATTERY (OPTIONAL)

Allows free and quick movement at any time of the day throughout the facility.

See kaivac.com for more information and complete specifications.
